

Dear FCC, August 11, 2006

Marlene H. Dortch, Secretary
Federal Communications Commission
Office of the Secretary
445 12th Street, SW
Room TW-A325
Washington, DC 20554

Re: Schools and Libraries Universal Service Support Mechanism, CC
Docket No. 02-6

Reply to Comments to Proposed Eligible Services List, Public Notice
Released July 21, 2006 (FCC 06-109); Suggestions for the 2007 Eligible
Services List related to Video Scheduling Service

Dear Secretary Dortch:

The North Carolina Department of Public Instruction and the North
Carolina Office of Information Technology Services supports the
comments
on the 2007 Eligible Services List related to video scheduling service
made by the Arkansas Department of Information Systems, the Arkansas
Department of Education, the Iowa Department of Education, the
Wisconsin
Department of Administration and the Wisconsin Department of Public
Instruction.

In a statewide video service, the scheduling service controls the
connection between the sending and receiving classrooms for every
class
session offered by the service. The scheduling function is not a
separate, non-telecommunications service but is essential to the
function and performance of the network.

The North Carolina Department of Public Instruction and the North
Carolina Office of Information Technology Services requests that the
Federal Communications Commission list video scheduling service as an

eligible service in the 2007 Eligible Services List.

Respectfully,

Benny E. Hendrix
E-Rate/School Connectivity Team Lead/Coordinator
North Carolina Department of Public Instruction
Education Building, Room 5079
